Professional Summary

Senior Developer with 8 years of expertise in React JS and PHP, focusing on web application development and team leadership. Proficient in React JS, Redux, JavaScript (ES6+), Laravel, and CodeIgniter, with significant experience in REST API integration and database management (MySQL, PostgreSQL). Skilled in debugging, performance enhancement, and developing secure, scalable applications. Experienced with Git, Docker, Postman, and Jira, dedicated to delivering software that adheres to CMMI Level 5 standards.

Skills

- **Frontend Development**
- React JS, Redux, JavaScript (ES6+), JQuery, Ajax, HTML, CSS, Bootstrap
- **Backend Development**
- PHP (CodeIgniter, Laravel), REST APIs, MySQL, PostgreSQL
- **Version Control & Collaboration**
- Git, Jira
- **DevOps & Tools**
- Docker, Postman
- **CMS & Debugging**
- CMS (WordPress), Debugging

Work History

Sr. ReactJS & PHP Developer

Aug 2022 - Current

ESDS Software Solutions

Nashik, India

- Built and maintained dynamic web applications using React JS and PHP frameworks
- Implemented role-based access control and optimized database queries
- Designed and developed REST APIs for seamless communication between frontend and backend systems

Sr. PHP Developer

Jun 2021 - Jul 2022

Prometteur Solutions Pvt. Ltd

Pune, India

- Developed scalable web solutions using Laravel and CodeIgniter, improving system performance by up to 40% and reducing server response time by 30%.
- Integrated 10+ third-party APIs (e.g., payment gateways, CRMs, analytics tools), enhancing application functionality and reducing development time by 25%.
- Collaborated with QA teams to ensure quality assurance, leading to 95% bug-free releases and reducing post-deployment issues by 40%.

Sr. PHP Developer

Dec 2020 - Jun 2021

Image Online Pvt. Ltd

Mumbai, India (Remote)

- Enhanced application performance and usability through optimized coding practices, resulting in a 35% faster load time and a 20% increase in user engagement.

- Built 15+ custom modules for CMS platforms (e.g., WordPress), improving client-specific functionality and reducing reliance on third-party plugins by 40%.
- Handled system debugging and issue resolution, decreasing reported bugs by 50% and improving system stability across multiple deployments.

PHP Developer

Jun 2017 - Nov 2020

Solace Technologies

Nashik, India

- Delivered end-to-end solutions for 10+ web-based projects, ensuring timely delivery and achieving 95% on-time completion by adhering to agile methodologies.
- Collaborated with cross-functional teams (design, development, QA) to meet project requirements, resulting in 100% client satisfaction and a 15% improvement in project delivery time.

Project

PHP (CodeIgniter) Projects

1. ICAR & ICARG POS System

A comprehensive POS system for agriculture retail operations.

- Built using CodeIgniter with real-time API communication.
- Features: sales tracking, product management, admin dashboards.

2. FAMRUT - Farmer POS Solution (CodeIgniter + Laravel APIs)

Point of Sale platform for farmers and agro-suppliers.

- CodeIgniter for frontend/backend, Laravel APIs for performance & scalability.
- Integrated inventory, billing, reporting, and centralized admin control.

3. Uzima - Hospital Management System (CodeIgniter + Laravel APIs)

Full-featured hospital management system.

- CodeIgniter handled UI/admin; Laravel APIs managed patient, billing, inventory.
- Built using jQuery, AJAX, and Bootstrap for responsive UX.

4. NERACE - Agri Trading Platform

Online marketplace connecting farmers, buyers, and sellers.

- Developed role-based backend modules using CodeIgniter.
- Supports product listings, secure transactions, admin oversight.

5. Zipeat - Home Chef Discovery Platform (Hybrid: CodeIgniter + Laravel)

Food delivery platform connecting users with home chefs.

- CodeIgniter used for admin/driver flows; Laravel APIs managed orders.
- Modules: chef onboarding, menu listings, order tracking.

6. Thrillsafar - Travel Booking Platform

Platform for booking camps, resorts, and bungalows.

- Developed using CodeIgniter with secure payments and real-time availability.
- Tracks user bookings and travel history.

7. Home Zone ERP

Internal ERP system for manufacturing operations.

- CodeIgniter backend for managing coil details, sizing, orders, and inventory.
- Enabled employees to generate and track product orders.

8. Punjab National Bank Website

Modern web platform for banking services.

- Rebuilt in CodeIgniter with API-based banking and account management.
- Included secure transactions and action logging.

PHP (Laravel) Projects

1. Zipeat - Home Chef Discovery Platform *(Hybrid: Laravel + CodeIgniter)*

- Laravel managed authentication, routing, and user interactions.
- Supported chef discovery, food orders, and delivery tracking.

2. Vennplay - Career Discovery Platform

Career matching platform using assessments and skill tracking.

- Laravel backend with REST APIs for user progress, career mapping.
- Used role-based modules, analytics, and user assessments.

3. Uzima - Hospital Management APIs

Laravel API services for hospital modules.

- Covered patient records, billing, inventory via secure REST APIs.
- Integrated with CodeIgniter frontend for seamless communication.

4. FAMRUT - POS System APIs

Laravel API layer for POS operations.

- RESTful APIs for sales, billing, reporting integrated into CodeIgniter UI.
- Real-time syncing and robust performance.

React.js Projects

1. ICAR & ICARG POS System

React frontend for agriculture POS.

- Real-time order management, stock updates, and reporting.
- Integrated with CodeIgniter backend APIs.

2. FAMRUT - Farmer POS Solution

Farmer-focused POS interface using React.

- Quick billing, scanning, reporting features.
- Synchronized with Laravel APIs for real-time data.

3. Krushak Odisha Unified Portal

Unified farmer platform built in React.js.

- Offers scheme calculators, chatbot, and public resources.
- Admin panel for content and activity management.

4. NERACE - Agri Trading Platform

Interactive React interface for farmer-to-buyer trading.

- Seller/buyer dashboards for posting, tracking, and trading.
- Powered by CodeIgniter APIs.

5. Vennplay - Career Discovery Platform

React-based UI for interactive career assessment.

- Real-time tests, feedback, and user progress tracking.
- Connected to Laravel backend for seamless data flow.

Education & CRM Projects (PHP + APIs)

1. MOATCRM & Education Choices (educationchoices.com)

Platform providing online and on-campus education opportunities.

- Developed and maintained APIs for student search and enrollment.
- Migrated recorded sessions across multiple servers.
- Built admin panel reports and dashboards.

- Focused on helping students/professionals access education without compromising family responsibilities.

2. FJN - Education Opportunities Platform

Similar to Education Choices, offering students access to top institutions.

- Developed custom APIs and reporting modules.
- Migrated media assets and recordings to distributed servers.
- Enhanced admin features for better educational data tracking.

3. BIFROST (list.graspy.com)

Lead generation tool for partners to validate and filter data via APIs.

- Built secure API filters and form integration modules.
- Used by authenticated partners for dynamic lead verification.
- Ensured data accuracy and efficient partner onboarding.

Education

Masters in Computer Science

MG Vidyamandir Institute of Management
GPA: 7.25

Jun 2018
Nashik

Bachelor in Computer Science

MG Vidyamandir Institute of Management
GPA: 60.25%

May 2016
Nashik

Diploma in Computer Technology

S.M.E.S. Polytechnic Nashik
GPA: 62.58%

Jun 2014
Nashik

SSC

DD Bytco Boys High School
GPA: 55.23%

May 2008
