✉ sudomali54@gmail.com | 📞 +91 7875503287 | [in linkedin.com/in/siddarth-dinesh-mali](https://www.linkedin.com/in/siddarth-dinesh-mali)

Skills

Programming Languages:	Python, Java, C/C++, JavaScript, SQL, HTML, CSS
Frameworks & Libraries:	ReactJS, NodeJS, TensorFlow, Bootstrap, Pandas, NumPy, Matplotlib, Seaborn
Tools & Platforms:	Android Studio, Jupyter Notebook, Tableau, Git, Postman, VS Code, Power BI
Core Competencies:	Data Analysis, Machine Learning, Web Development, API Integration, ETL Pipelines

Work Experience

Magneto IT Solutions, Pune

July 2022 - July 2023

Jr Software Developer

- Developed the Aljuman e-commerce application for both mobile and web platforms. Designed an engaging UI for the mobile app and implemented the web app's front end. Integrated APIs to ensure seamless backend functionality.
- Built the mobile app interface using XML in Android Studio and connected it to APIs for real-time data exchange. Designed and developed the web front end with React.js and managed backend API connectivity using Node.js. Delivered a feature-rich, responsive, and user-friendly e-commerce solution. Achieved seamless interaction between front end and backend, enhancing user experience and operational efficiency.
- Python, Kotlin, JavaScript, XML, ReactJS, NodeJS, Android, Postman

Exposys Data Labs, Bangalore

May 2021 - June 2021

Internship

- Developed a project titled "Diabetes Prediction Using Machine Learning," focused on forecasting an individual's likelihood of developing diabetes in the future.
- Leveraged libraries such as Pandas, Seaborn, and SciPy for comprehensive data preprocessing, analysis, and visualization. Employed machine learning algorithms including SVM, KNN, Random Forest, Decision Tree, Logistic Regression, and Gradient Boosting to design and evaluate predictive models. Achieved 77% accuracy, demonstrating practical application of ML in healthcare analytics.
- Python, Jupyter Notebook, Seaborn, Pandas, Scipy, Data Cleaning, Data Pre-Processing, Algorithms, Visualization

Education

Griffith College Dublin

Sept 2023 - Sept 2024

Master of Science in Big Data Management and Analytics

Percent: 58%

Relevant Coursework: Big Data Analytics, Information Retrieval and Web Search, Concurrent and Parallel Programming, Cloud Computing, Big Data Management, Data Mining Algorithms and Techniques, Applied Data Science, Research Methods

Sandip University Nashik

July 2019 - May 2022

B.Tech. in Computer Science and Engineering

CGPA: 8.82/10

Relevant Coursework: Object Oriented Programming, Databases, Discrete Maths, Data Structures and Algorithms, Operating Systems, Computer Networks, Machine Learning, Data Mining, Operation Research

Project Work

- **Aljuman (2023):** Implemented a RecyclerView to display data fetched from APIs using the MVVM (Model-View-ViewModel) architectural pattern. Data retrieval was handled efficiently with Retrofit, and the user interface was designed using XML layouts for a seamless experience.
- **Parkinson's Disease Detection using MRI Images (2024):** Performed data cleaning and visualization, and applied deep learning algorithms such as CNN alongside Naive Bayes. Compared models to identify the most effective classifier. Used Python, TensorFlow, SciPy, Pandas, NumPy, Matplotlib, Django, VS Code.
- **Loan Default Prediction (2022):** Applied Decision Tree, KNN, and Gradient Boosting algorithms to predict loan defaults. Conducted data cleaning, preprocessing, visualization, and feature transformation. Achieved 92% accuracy. Used Python, Pandas, NumPy, Matplotlib, Flask, Jupyter Notebook.

Awards and Certificates

- **Mentor at Scaler Academy:** Participation in National e-Conference on RTCEA-2022.
- Android Development training from Technokraft.
- C/C++, Java, and Advanced Java Courses from Technokraft.
